Team Building Through Filmmaking

We've been on more film sets than we can count, and if there's one constant in the filmmaking world, it's that great work always relies on great teamwork. Give your team a creative boost which will train them in the practical arts of storytelling on screen, and enhance their skills in leadership, decision making, trouble shooting, delegation, prioritizing, setting goals, time and task management and critical thinking (to name just a few!)

Create Content You Can Use

Our experienced industry professionals and educators will guide your team through the process of creating compelling content that your business can use across all sorts of platforms. We specialize in narrative short film, documentary, corporate culture videos and promotional spots, with an emphasis on teambuilding skills built in – every step of the way.

Made By You

To get the most out of our program, we offer a complete 48 hours of training [4 hours per week over 12 weeks] guiding your team through the entire process of completing a short film, from inception to screening. We'll help your filmmakers to tell your story, from creating a brief, to writing a script, through to shooting and editing. Engage stakeholders, employees and the wider community by generating positive feedback for your business.

We can even help you plan your very own film festival or screening event – and we'll be there to capture the results for you to share!

Flexible Structure

Our Filmbuilding program can be fully customized to meet the requirements of your organization, with weekday, evening and weekend workshops available, either on site or at our studio in East Downtown – plus we provide all the equipment you'll need! We can even arrange short, intensive bootcamps and one-off workshops to hone your employees' team building skills while pushing their creative boundaries.
